

SATURDAY, JUNE 2, 2018 – 5 AM WEATHER FORECAST

The storm last evening dropped .50-1.00+” of an inch around the area. These same storms also played a large role in keeping us dry through the overnight and early this morning. There is still a little activity showing up on the radar right now, but today is starting to look a lot more promising in terms of any precip hitting the immediate area. Expect a mix of sun and clouds this morning with better chances of dry weather through the mid-morning. Although temps look to push 90 degrees with a heat index of 95+ this afternoon, that should be enough to kick off more shower and storm development 11:30 AM to 2:30 PM with a shower or storm still possible at 4 PM. Tonight will start off quiet, but we will need to keep an eye out for a storm complex to our northwest to be sure it doesn't get here by Sunday morning. Otherwise a cold front associated with an upper level trough will march through central Alabama tomorrow afternoon bringing another chance of showers/storms Sunday afternoon.
