

WEDNESDAY, JULY 26th, 2023 - 6 AM U.S. Junior Amateur Weather Forecast

Mostly sunny skies this morning will give way to approaching clouds just before the noon time hour, which will only help to provide a brief moment of shade as they pass by overhead as we have a looking straight down the barrel of another hot humid day here on Daniel Island with high temps this afternoon once again flirting with that 95 degree mark to go along with a heat index well over 100 degrees. To make matters once, winds will once again be light for the majority of the day before finally kicking into gear just as the last match gets underway this afternoon, with flow then blowing from the SE at 6 - 8 mph gusting into the teens at times. With the influence of the ridge in place, that shift in winds over the to the SE will be the indicator for pop - up showers and storms to begin across the region but like we have done the first two days of this championship, we are looking to remain dry from any impact, even if it is only a few miles from us like on TUE. More of the same for THU before a surface low moving across FL into the Atlantic on FRI increases the chances for showers and storms FRI and SAT slightly producing stronger winds.
