

WEDNESDAY, JULY 16, 2025 – 6 AM WEATHER FORECAST

After 0.43" in yesterday's thunderstorm, we look to a more encouraging forecast for Wednesday. A minor 5 - 8 mph breeze will sustain out of the east/southeast and should act to keep things a touch cooler than days' past. While a thunderstorm can't be ruled out, the chance is reduced compared to Tuesday. Any thunderstorm activity peaks after 2 PM, with 7 to 11 PM being the hours of greatest interest. The daily threat of thunderstorms persists through the end of the week, with temperatures retaining the mid-July heat. To avoid the worst-case rainfall totals, we will have to endure multiple days of triple digit heat indices!
