

TUESDAY, JUNE 13, 2023 – 5 AM WEATHER FORECAST

Temps managed to get into the middle 50s during the middle of the night when we had clear skies, but like a movie franchise that has had way too many sequels, the marine layer cloud cover is back again and has warmed us up to the upper 50s to begin our day. Overcast skies will have some holes in them at times this morning, with mostly cloudy conditions transitioning to partly sunny skies as we get closer and closer to lunchtime. The forecast for this afternoon calls for mostly sunny skies a good portion of the time and before the wind picks up is when we'll have our best chance at climbing past 70 degrees. Then as southwest winds gust well into the teens early to mid afternoon, temps will back down a few degrees. Look for low clouds with patchy fog/mist to be possible tonight into Wednesday morning and the outlook for Wednesday into Thursday is pretty much the same. Morning clouds give way to some afternoon sunshine each afternoon with it looking like overall a little less sun than we'll have today. Temps will try to get higher in the 70s for Friday and most likely will do so on Saturday before falling back towards average on Sunday.
