

SUNDAY, AUGUST 14th, 2022 - 7 AM WEATHER FORECAST

Clear skies overhead and calm winds at the surface will allow the fog to continue to form around the course as the sun begins hitting it this morning. In similar fashion to what we dealt with on Wednesday, visibility over the next 2.5 hours will become fluid in nature as the sun attempts to burn off things at the surface and in doing so evaporative cooling then reforms it pushing it up and over the hill towards the clubhouse. Again, like we saw on Wednesday, once the sun is able to burn off the moisture at the surface, we have another beautiful day in store to finish up the championship with mostly sunny skies allowing temperatures to warm back up to near 80 degrees late this afternoon with very light winds blowing mainly from the NNE the majority of the day picking up slightly just before sunset this evening with speeds still blowing less than 8 mph. Skies will remain clear overnight as the upper - level ridge starts to settle into the region providing another week of highs climbing into the low 90s throughout the region with winds then remaining primarily out of the north.
