

MONDAY, JULY 17, 2023 – 6 AM WEATHER FORECAST

Today we will start out chilly and clear and calm in the morning hours, but we will not stay that way for too long as we should quickly begin to warm up with winds picking up as well. Our best chance of seeing rain today has shifted into the later afternoon with rain possibly dragging into this evening as well. Even with the clouds moving in this afternoon we should still reach a high of mid to high 80s today with wind from mostly a northerly direction. Wind speeds are expected to be lower in the morning hours but speeding up going into the afternoon. Tomorrow we will start out mostly clear and sunny again, but the clouds will begin to fill in the afternoon and bring back our chance of afternoon showers and storms. These showers and storms will be much less spread out on Tuesday compared to what is forecasted today, but again even with the chance of rain and storms we are still expected to hit a high in the mid 80s. Later in the week more of the same is expected with highs in the mid to upper 80s and the chance of an afternoon shower / thunderstorm.
