

MONDAY, JUNE 26th, 2023 - 11 AM U.S. Senior Open Weather Forecast

We have lived right on the edge this morning with radar continuing to show showers passing by just to our east as Sunday's system slowly churns its way east across the Great Lakes. The impact on us has instead been reduced to thick, low hanging clouds that show no signs of breaking ahead of the sun setting this evening coupled with strong winds out of the northwest that are expected to continue to increase afternoon lunch with averages near 16 mph gusting into mid to upper 20s. The lingering cloud cover will have the ability to produce a drop or two early on this afternoon as sections of this system that have passed over Lake Michigan and Lake Superior work their way over us with no accumulation expected to occur. Instead, heavy cloud cover will limit surface heating keeping temperatures in the low 70s this afternoon as clearing skies overnight Monday have overnight lows falling down into the mid 50s generating our coolest morning of the week on Tuesday. For the rest of tomorrow, sunshine will finally make an appearance during the morning hours pushing temps back near 80 degrees as winds taper off throughout the day.
