The United States Golf Association (USGA) announced today that Trackman is the official launch monitor and simulator of the U.S. National Development Program (USNDP).

Trackman product and services will be available to USNDP athletes year-round, including coaches' ability to assign skills and practice range tests to athletes remotely through Trackman accounts. Trackman representatives will also be present at national junior team and state junior team camps for on-site activation and support.

“Trackman’s commitment to the U.S. National Development Program is an investment in our young athletes across the country,” said Heather Daly-Donofrio, managing director, U.S. National Development Program. “The technology and services at our disposal from this partnership will give our athletes the tools to learn, develop and improve.”

The U.S. National Junior Team gathered the first week of March at Desert Mountain Club for spring camp and had two days of testing and range training using the Trackman technology. The team gathers twice a year at training camps, spring and fall, and range and skills testing are a key focus for the coaches and consultants.

“Trackman’s commitment to the U.S. National Development Program is an investment in our young athletes across the country,” said Heather Daly-Donofrio, managing director, U.S. National Development Program. “The technology and services at our disposal from this partnership will give our athletes the tools to learn, develop and improve.”

“Having Trackman on site at our national junior team camps is a huge step forward for us,” said Chris Zambri, head coach of the U.S. National Development Program. “The ability for us coaches to gather immediate feedback when working with our athletes completely changes how we practice and allows us to be intentional with our training.”

Trackman technology will help with talent identification for the USNDP and support the program’s USNDP THRIVE™ training. USNDP and state junior team coaches will have access to Trackman University software for training modules and tests. As part of the agreement, Trackman will provide 15 launch monitors to be used by USNDP athletes and at USNDP camps and trainings.

“Partnering with the USGA and supporting the USNDP is a real privilege for us at Trackman,” said Matt Frelich, Senior Vice-President, Sales & Business Development for Trackman. “This partnership reflects a shared commitment to developing the next generation of American golfers. By providing our technology - trusted at the highest levels of the game - we’re enabling our athletes and coaches to train more effectively, make better decisions, and track progress year-round. More than that, we believe in creating clear pathways for young talent to grow, compete, and succeed on the global stage. We’re excited to be part of this journey and the future of golf.”
